

Doc-T

unpacked.

“ *Be fitted with light action privacy bolts operable with a closed fist and operable by people with a variety of dexterity or strength combinations.*

Be capable of being opened from the outside if a person has collapsed against it while inside the toilet room or cubicle. ”

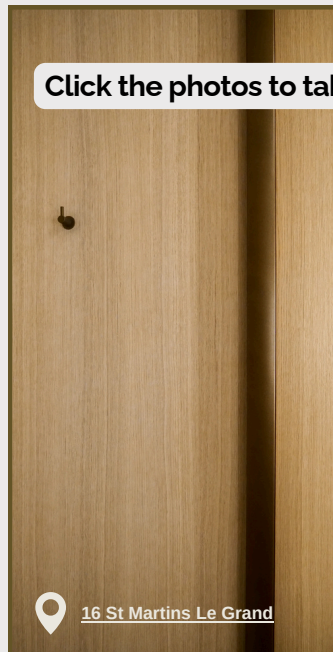

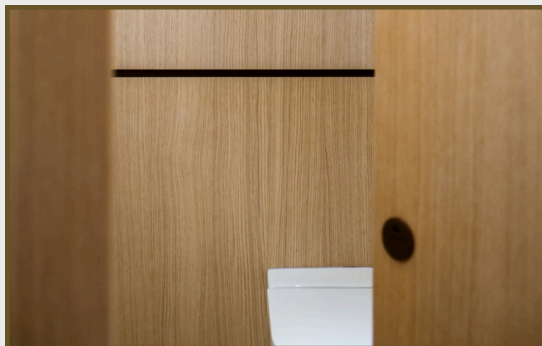

“ *If the door is inward opening, have an emergency release mechanism so that the door is capable of being opened outward, from the outside, in case of emergency, such as when a person has collapsed while inside the toilet room or cubicle.*

Our Solution

Movana Emergency-Access Cubicle

- 🕒 3-second access in emergency
- 🔄 Ability to open outwards in emergency
- ❤️ No compromise on aesthetics (full-height and any finish)
- 💡 LED occupancy indicator
- ✅ Doc-M & now Doc-T compliant
- 🛠️ No heavy lifting or tools required to open in emergency
- 👷 No PPE required
- ♿️ Intuitive use (no sacrificial access/damage required)
- 👉 Indicator is easily reinstated ready for use
